`pst-gantt` loads by default the following packages: `pst-node`, `pst-grad`, `pst-xkey`, and, of course `pstricks`. All should be already part of your local T_EX installation. If not, or in case of having older versions, go to <http://www.CTAN.org/> and load the newest version.

1 Environments and Macros

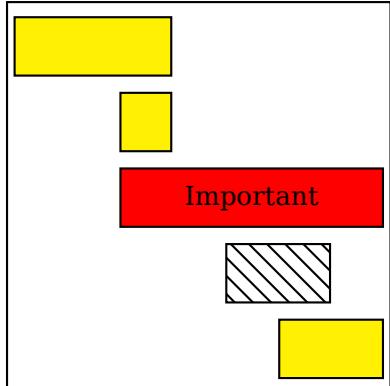

The main environment is `PstGanttChart` with the following syntax:

```

```
\newpsstyle{Important}{fillstyle=solid,
            fillcolor=red}
