## Abstract

This package produces a very nice layout and typeblock for small book, working under the `memoir` document class. The package contains several options and the names of the options are the same names as the writers of those books.

## 1 Use It!

If you want to use this package just put the following line in your preamble:  
`\usepackage[options]{fjodor}`.

This package contains several options.

**fjodor** which I have dedicated to Fjodor Mihailovič Dostojevski, produces a layout of a `\page{largecrownvo`, a textblock of  $9.5 \times 15.5$  cm, a 1.5 cm spine, and a 2.5 cm upper margin, particularly useful for a 10pt font size.

**katajev** which I have dedicated to Pavel Valentinovič Katajev, produces a layout of  $17.5 \times 11.7$  cm, a  $9.1 \times 14.3$  cm typeblock, and a 1.3 cm spine and upper margin. The total number of text lines is 34.

**hese** which I have dedicated to Hermann Hesse, produces a layout of a  $19.8 \times 14$  cm, a textblock of  $9.8 \times 14.3$  cm, a 1.75 cm spine and a 2.1 cm upper margin. The total number of text lines is 34.
