

icite sample file — ©① This file is public domain

Instructions

- (a) Start a new document, copy and paste the code that follows.
- (b) The default citation command used by icite has been set to `autocite`. Adapt.
- (c) The biblatex style file selected is `oxnotes`. Adapt.
- (d) Insert the citations in the body text with

```
\icite[<pre>] [<post>]{<key>}
```

- (e) Compile the document with `--shell-escape`.¹

```
\RequirePackage{filecontents}
\begin{filecontents*}{\jobname.xdy}
(merge-rule "\*" "" :regexp)
\end{filecontents*}
%
\documentclass{article}
\usepackage[english]{babel}

% load icite
\usepackage[citecmd=autocite, defaultindex=loccit]{icite}
\bibinput{bibliography}

% prepare the index
\usepackage[xindy]{imakeidx}
\makeindex[% 
    name=loccit,
    title={Index locorum citatorum},
    options=-M \jobname.xdy]

% load biblatex
\usepackage[style=oxnotes]{biblatex}
\addbibresource{bibliography.bib}

\begin{document}

Your document goes here.

\printindex[loccit]
\printbibliography
\end{document}
```
