

This is a sample document testing nested link text. The `glossaries-extra` package temporarily modifies commands like `\gls` or `\glsxtrshort` that occur in fields, when any of those field is accessed through linking commands.

First use: [SSI enabled HTML \(SHTML\)](#).

Next use: **SHTML**.

Glossary

HTML hypertext markup language [1](#), [3](#)

SHTML server side includes (ssi) enabled hypertext markup language (HTML)
[1](#), [2](#)

SSI server side includes [1](#), [3](#)
