

Lemma's disambiguation

Summarium

This file provides an example of lemma's disambiguation.

All word which can potentially be twice (or more) in a same line is marked by an “*sameword*. *reledmac* print the word rank only if the word is effectively printed twice (or more) time in the same line.

For use with “*lemma*, please read the handbook.

- ¹ Leo aut ursus aut oryx aut ricinus aut equus aut lupus aut canis aut felix aut asinus
- ² aut burricus.

¹ aut⁶] et
² aut] et

¹ aut⁶] monotone...
