

# Sectioning commands with critical notes in parallel pages

September 25, 2017

This file provides examples for using the sectioning command with eleedpar. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in parallel pages. Following the standard behavior of eleedpar, only the left titles are put to the table of contents.

We use the \eleedxxx commands, each of them in their own \pstart...\pend group.

Page breaks are manually added before chapter with \beforeeleedchapter.

# Contents

<b>1</b>	<b>Left chapter</b>	<b>6</b>
1.1	Left section . . . . .	6
1.1.1	Left subsection . . . . .	6

2.3.1	Left subsection . . . . .	12
2.4	Left section . . . . .	12

# **Chapter 1**

## **<sup>1</sup> Left chapter**

<sup>2</sup> I use git to manage some packages. I would like to add a pre-commit hook,  
<sup>3</sup> to check if I have forgotten For now, I have a minimal pre-commit, which tests  
<sup>4</sup> only the blank spaces at ends of lines, but not the forgotten.
