NAME

tex2aspc − converts conventional MusiXTeX scores to .aspc format for processing by **autosp**(1).

SYNOPSIS

tex2aspc [**−v** | **−−version** | **−h** | **−−help**]

tex2aspc *infile*[.tex] [*outfile*[.aspc]]

DESCRIPTION

This program re-factors (sequences of) conventional note-spacing commands (\notes \Notes \NOtes ...) in a measure into a single \anotes command. This is intended for "legacy" scores in order to take advantage of features only provided by **autosp**(1), such as "global" skips and processing of TransformNotes commands.

LIMITATIONS

tex2aspc assumes that & and | (rather than \nextinstrument and \nextstaff) are used to separate instruments and staffs.

User-defined macros are not processed or expanded.
